

Product Requirements Document (PRD)

Project Name: Serene Web Platform **Document Version:** 2.0 **Focus:** Full-Stack Web Application + Integrated AI/ML Pipeline

1. Executive Summary

Serene is a secure, intelligent mental wellness web platform. It merges highly personalized machine learning with empathetic conversational AI. The app provides users with a highly calming, nature-inspired interface to log their moods, receive deep clinical insights (via LangGraph/LLM-I), and converse with a long-term memory AI companion named Aura (via Vector RAG/LLM-II).

2. Target Audience

- Students managing exam stress (JEE/NEET).
- Professionals experiencing corporate burnout.
- Individuals seeking a private, intelligent space for emotional tracking.

3. Core Features (MVP)

1. **Secure Authentication:** Encrypted registration and login.
2. **Wellness Dashboard:** A calming "Organic Calm" interface featuring dynamic daily greetings, a mood check-in (overlapping pill-shaped action bar), and sliding insight cards.
3. **Intelligent Insights (LLM-I):** The dashboard displays 4-5 deep, personalized clinical insights generated daily by analyzing the user's ML stress score and SHAP feature drivers.
4. **Aura AI Companion (LLM-II):** A secure, conversational chatbot interface with long-term vector memory (RAG) that adapts to the user's historical context.
5. **Smart Daily Nudges (LLM-III):** RLHF-powered proactive nudges offering actionable micro-therapies based on user feedback.
6. **Guided Content Library:** A grid of therapeutic audio/video sessions presented in softly rounded cards.
