

UI/UX Design System: "Organic Calm"

1. Core Philosophy

The design must evoke the feeling of stepping into a quiet forest. Based on the reference aesthetic, the UI utilizes heavily rounded corners, overlapping floating elements, and natural earth tones, entirely avoiding a sterile, generic "tech" or "AI-generated" look.

2. Color Palette

- **Background Base:** Soft Cream/Off-White (#FAF8F4) - Prevents eye strain.
- **Primary Accent:** Forest Green (#3B5A40) - For primary buttons, pill containers, and text.
- **Secondary Accent:** Sage/Olive Green (#7C9A7E to #B8D4BA) - For overlapping cards and highlights.
- **Text:** Deep Charcoal/Slate (#1A2332).

3. Shape & Geometry

- **Action Bars & Buttons:** "Pill-shaped" (rounded-full).
- **Insight & Content Cards:** Highly rounded corners (rounded-2xl or rounded-3xl).
- **Shadows:** Soft, diffused, tinted green/brown shadows. No harsh black drop-shadows.

4. Key Component Layouts

A. The AI Wellness Dashboard (Hero)

- A beautifully rendered nature landscape image.
- **Floating Action Bar:** A pill-shaped green container overlapping the bottom edge of the hero image for the "How are you?" mood check-in.
- **Dynamic Insights Grid:** Below the hero, sliding horizontal cards populate with the JSON output from Component 2 (Deep Insights).

B. Aura Chat Interface

- A calming, full-height chat window with a cream background.
- User messages are Sage green pills; Aura's messages are clean, borderless text blocks.
- Includes a subtle "Memory Active" indicator showing RAG is working.
